Taking care of ageing parents can be overwhelming, especially when they are staying in a different city; access to healthcare becomes difficult and coordinating with care providers becomes tiresome. Therefore, we at Portea bring to you eldercare plans.
Portea Medical is India’s home healthcare pioneer. Portea is the largest and fastest growing provider of in-home medical care in India today with a 24-city network. Portea’s comprehensive services encompass eldercare, post-operative care, palliative care and physiotherapy. We offer home visits from Physiotherapists, Nursing attendants, Nurses and Doctors. In addition, we also provide collection of lab samples from patients’ home and medical equipment’s for hire or sale. We believe in bringing the entire gamut of healthcare services to a patient’s doorstep.

What our customers say

Ms. Vijayalakshmi
My mother was bed ridden for four months. We believed that she could never recover from that condition. She was brought home and I sought the help of Portea services. They promptly sent the doctors. In one of the visits. Dr. Joe made me believe that my mom could be without catheter and diapers. He spent an hour with the Rand made complete investigation. Her BP, sugar, and gave a report. This helped me take further assistance from specialists. The physiotherapist also attended her very well. Now my mom is independent. She doesn't need diaper or catheter. She is walking with the help of a walker, sometimes trying to walk without it also. Even now Portea calls us to enquire my mother’s condition. I appreciate their timely support when I was in agony and anxiety. A team of doctors have put in their specialisation and gave the right treatment and advice. Thank you Portea!

Ms. Savitri Babbar
Saba, the lady who deals with all our enquirers is very efficient, helpful and pleasant. She is always there to help in whichever way she can ... Nothing is too difficult to do for her. Very good work by Saba, always there to help arrange whatever is needed. Doctors who attend are capable and helpful our thanks to her.

Mr. Vimal Parthasarathy
Portea has been taking care of my 80 year old mother’s primary healthcare needs for the past few months now. I must say it’s been a delight to deal with them. While their doctor’s and physio are competent, it’s the dimension of 'customer service' which contributes to their overall competence. Meticulous follow ups from doctors as well as executives, reminders on scheduled tests, doctor visits etc. are programmed and require virtually no following up from our end. Overall a very satisfying experience.
